

#### AKZO coupling in PE

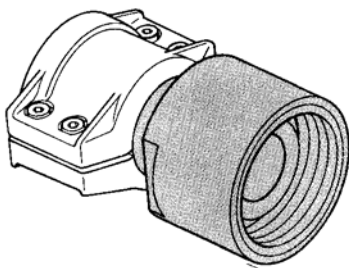

#### AKZO liquid transport coupling

Chemicals such as caustic soda, hydrochloric acid and bleaching liquor are transported by tanker with bulk deliveries. The liquid product is then emptied through a hose connection into the buyer's storage tank. The parts coming into contact with the liquid are made of a corrosion-resistant type of polyethylene.

The coupling is generally suitable for inorganic liquid acids, bases and saline solutions and is suitable for organic solvents. The couplings are fitted on the hoses with safety clamps (see page 27).

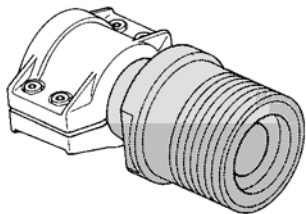

#### Attention

All AKZO couplings are also available in white polyethylene with left M88x8 thread specially for the loading of bleaching liquor.

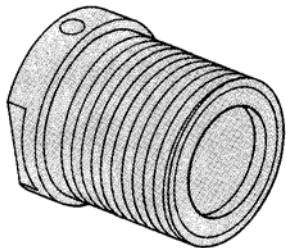

#### AKZO coupling with swivelling female thread M88x8

- material : - black polyethylene  
 - suitable for chemicals hose with inside diameter 50 mm  
 - assembly using aluminium safety clamps  
 ERIKS article no.: 10037238

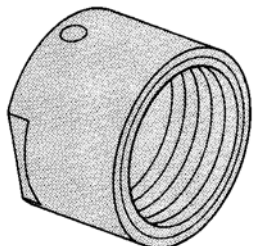

#### AKZO coupling with fixed male thread M88x8

- material : - black polyethylene  
 - suitable for chemicals hose with inside diameter 50 mm  
 - assembly using aluminium safety clamps  
 ERIKS article no.: 10037237  
 material : - white polyethylene  
 ERIKS article no.: 11024018

#### AKZO seal plug with M88x8 male thread

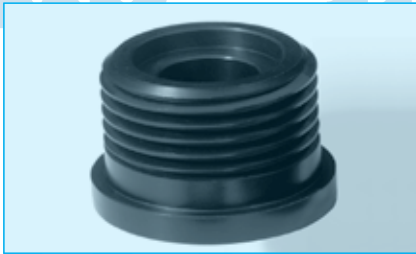

- material : - black polyethylene  
 ERIKS article no.: 10037240

#### AKZO sealing cap with M88x8 female thread.

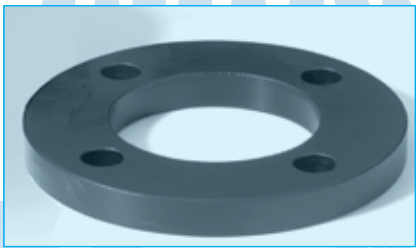

- material : - black polyethylene  
 ERIKS article no.: 10037239  
 material : - white polyethylene  
 ERIKS article no.: 10037242

#### AKZO coupling in PE

AKZO flanged bush with M8x8 male thread

- Material : - black polyethylene  
ERIKS article no.: 10037244
- Material : - white polyethylene  
ERIKS article no.: 10037241

AKZO flange drilled according to DIN 2501 PN 10 DN 50  
(fits behind abovementioned flanged bush)

- Material : - black polyethylene  
ERIKS article no.: 10037243
- Note : - also available in steel and stainless steel

AKZO sealing ring

- Material : - Viton  
ERIKS article no.: 10037658
