

### RX® Eriflon series 1000 HD

#### Application

Robust and smooth transport hose of thick-walled PTFE quality with PTFE-collared couplings for applications where a sanitary connection is required. Suitable for chemicals and food. The smooth inside wall means a relatively large bending force is required.

#### Temperature range

-60 to + 260 °C

#### Couplings

PTFE-collared flanges in both steel and stainless steel according to DIN or ANSI  
Other connections available on request.

#### Order number/design

- 1011HD: white with stainless steel 304 braiding
- 1011 HD AS: black (antistatic) with stainless steel 304 braiding

#### Special design

with Hastelloy-C braiding for the transport of chlorine

#### RX® Eriflon series 1000 HD

DN	Internal diameter (mm)	Wall thickness (mm)	Bend radius (mm)	Working pressure (bar)	Maximum length (mm)	Vacuum %
1/2"	16	1,20	200	10	6000	80
3/4"	22	1,20	225	10	6000	80
1"	22	1,20	225	10	6000	80
1 1/4"	28	1,50	350	10	6000	70
