

# RX<sup>®</sup> Eri-sleeve

## Anticipate on high investments, use an RX<sup>®</sup> Eri-sleeve

The application of RX<sup>®</sup> Eri-sleeve shaft repair sleeves is a proven solution to save time and money. The RX<sup>®</sup> Eri-sleeve is a complete shaft repair set to repair damaged shafts. This article can also be applicable to protect new shafts and to provide them with the optimal contact surface for an oil seal.

RX<sup>®</sup> Eri-sleeve shaft repair sleeves are carefully manufactured precise parts of chromed stainless steel. The sleeve has the right hardness and has an excellent surface through which the period between the repairs is extended. The ultra small wall makes it possible to keep using the same size of oil seal after the assemblage above the damaged part of the shaft.

In most cases you will be able to mount the RX<sup>®</sup> Eri-sleeve without disassembling your shaft. This in turn will save you a lot of time and money in your production environment. And you won't even need to invest in special tools.

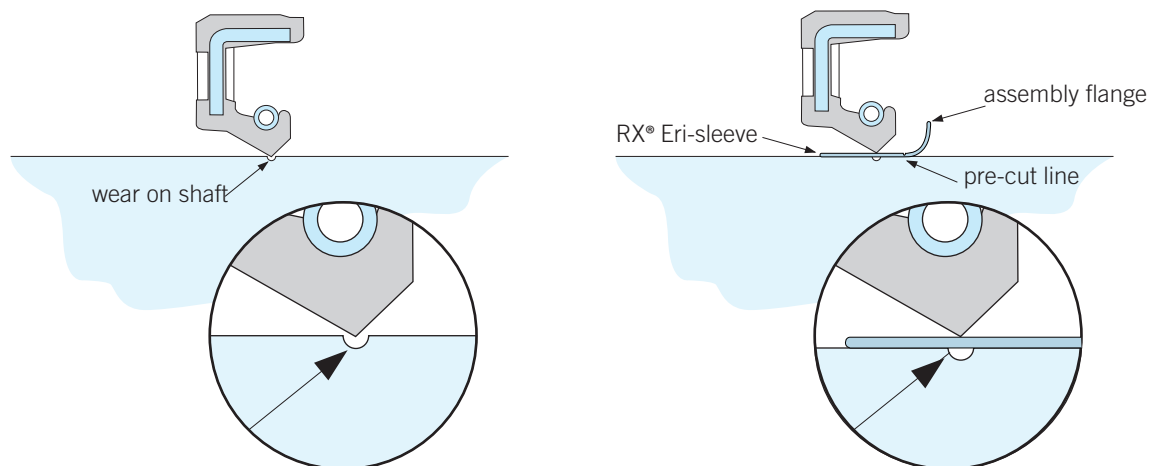

The RX<sup>®</sup> Eri-sleeves are now available in wide range of sizes, from shaft size 12 mm up to 200 mm. Other sizes available on request.

Please also check the stocklists for the availability of the requested size.

### Advantages:

- very simple to assemble
- large assortment, deliverable directly from stock
- huge savings in costs
- extended life time thanks to a perfect contact surface

know-how makes the difference
